

ULTRAMAN MEBIUS

After 25 years of peace, the monsters that once threatened to demolish the world attack once more. But Crew GUYS, the high-tech team whose job it is to protect Planet Earth is unprepared for the attack. Within minutes the fearsome monster Dinozole destroys the entire team except for one member. Ultraman Mebius, a young Ultra Hero sent from planet M-78 to keep watch on our world comes to the rescue and defeats Dinozole. But the threat to Planet Earth isn't over. A new Crew GUYS team must be recruited quickly to face the monsters. Will this rookie team prove themselves able to take on this terrifying threat to humanity?

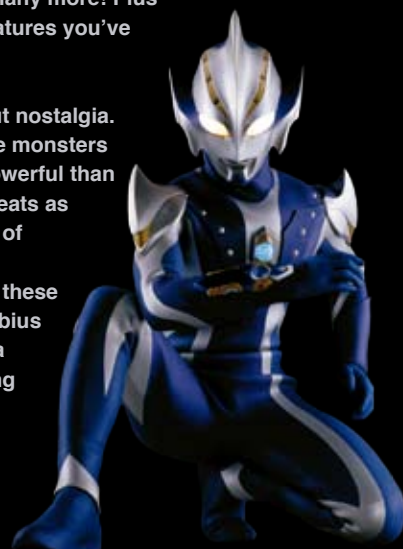

To mark the 40th anniversary of Ultraman, Tsuburaya Productions has created the ultimate Ultraman series. Like its companion theatrical feature, "Ultraman Mebius and the Ultraman Brothers," the Ultraman Mebius TV series features the return of your favorite Ultra Heroes and Ultra Monsters from the series' rich 40-year history. From the valiant Father of Ultra to fan-favorites like Ultraman 80 and Ultraman Leo it's a reunion of all the Ultraman characters audiences have loved for the past four decades.

The monsters are back, too! Tsuburaya Productions has brought

back the monsters that fans have asked to see again and again, like the insect monster Twintail, the fearsome Alien Mefilas, the space monster Bemstar and many more! Plus we've added exciting new creatures you've never seen before!

Ultraman Mebius isn't all about nostalgia. Using exciting new effects, the monsters are faster, fiercer and more powerful than ever before. Hold on to your seats as Crew GUYS introduces a host of exciting new air, sea and land vehicles to protect Earth from these monsters and as Ultraman Mebius teams up with the mighty Ultra Family to stop these rampaging creatures.

You won't want to miss a second of Ultraman Mebius!

2006 50 half hrs.
